

Tetramer analysis of CD8⁺ T cells after vaccination three times with virus-like replicon particles (VRP)-neu or VRP-hemagglutinin (HA)

Vaccination	CD8 ⁺ cells (%)	Tetramer-positive CD8 ⁺ cells (%)	Tetramer-positive CD8 ⁺ /CD8 ⁺ (%)
<i>neu</i> -specific tetramer			
VRP- <i>neu</i>	15.98	0.38	2.38
VRP-HA	23.06	0.05	0.22
<i>HA</i> -specific tetramer			
VRP- <i>neu</i>	16.01	0.06	0.37
VRP-HA	17.46	0.50	2.79
